# Trends in Integrated Reporting that Support Sustainable Growth in Japan 2021

In 2021, the number of Japan-based companies that issued integrated reports increased by over 100 compared with 2020, exceeding the 700-company mark. While there had been a somewhat of a slowdown in growth from 2019 to 2020, it started ramping up again in 2021. Underlying this change is a worldwide continued expansion of ESG investment and the ongoing strengthening and expansion of information disclosure regulations for companies. 2021 saw a particular uptick in action related to the establishment of disclosure standards. In June 2021, the International Integrated Reporting Council (IIRC) and Sustainable Accounting Standards Board (SASB) merged to create the Value Reporting Foundation (VRF). Additionally, the IFRS Foundation, the private organization that formulates the International Financial Reporting Standards (IFRS), announced the establishment of the International Sustainability Standards Board (ISSB), which is tasked with coordinating disclosure standards for sustainability-related information. It was also announced that the VRF and the Climate Disclosure Standards Board (CDSB) will be consolidated into the IFRS Foundation by the end of June 2022. Further requirements for sustainability-related disclosure, paying heed to ISSB standards, are expected in 2022.

However, with the continued expansion of sustainability-related disclosure, an issue has come to light; there are few reports that logically explain the connection between a company's sustainability-related initiatives and their corporate value. It is not enough to disclose sustainability-related information simply because an external organization requires it. Now more than ever, it is crucial that companies explain why this information is important to them and how they will improve the provision of it. Moreover, they need to express this information as a specific and logical story.

Armed with this approach, a company can harness financial and sustainability-related information as strategies to show stakeholders inside and outside the company the path toward raising corporate value and then bring them into agreement on taking that path. This will make a company's business model all the more sustainable. Now that information disclosure standards are expanding, it is necessary not only for disclosure to meet those standards, but to make a return to original spirit. Our hope is that integrated reports will become an indispensable tool for all companies as they work toward the sustainable improvement of corporate value.

February 2022  
Corporate Value Reporting Lab

## Corporate Value Reporting Lab

# List of Organizations in Japan Engaged in the Publication of Self-Declared Integrated Reports (2021)

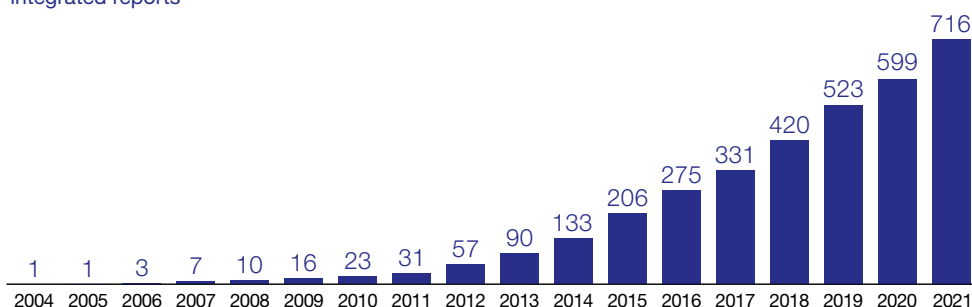

As of the end of December 2021

Note: Taking into account publication delays as a result of COVID-19, the 2021 edition of this report includes integrated reports issued up to January 20th, 2022 by companies that continued issuing such reports.

Self-declared integrated reports are categorized as such by the Corporate Value Reporting Lab when a report states that it is an integrated report in its editorial policy or elsewhere, or when a report contains comprehensive financial and non-financial information as well as reporting on corporate value creation and other matters that reflect deliberate integrated reporting.

(The Corporate Value Reporting Lab replaced the ESG Communication Forum in October 2015).

### Trend in the number of organizations in Japan engaged in the publication of self-declared integrated reports

\* When a report states in its editorial policy or elsewhere that it is an integrated report, or if a report contains comprehensive financial and non-financial information while also containing language that implies that the report was prepared with considerations made for integrated reporting (pertaining to corporate value creation or otherwise), the report is counted as a self-declared integrated report.

Survey based on listed companies, with non-listed companies and other corporations and entities. Year is based on report publication dates and the survey applies principally to companies that adopt an annual reporting cycle. Should we receive no negative criticism regarding this method, we will continue to employ it next year and onward. Specification of the year that a company switched to integrated reporting is based on this method.

Organization name	Report name	First year of implementation
Acom Co., Ltd.	Integrated Report 2021	2021
